SUMMARY

Engineering leader at Salesforce owning the AppExchange marketplace (500K MAU, \$250M+ ACV), leading 17 engineers across search, discovery, and transactions. Led marketplace transformation including launch of Salesforce's first AI marketplace (AgentExchange) and a full discovery overhaul (+107% impressions, +66% clicks). Known for scaling teams, increasing engineering velocity, and leading cross-functional initiatives.

EXPERIENCE

Senior Engineering Manager, AppExchange

February 2022 – Present

Salesforce – San Francisco, CA

- Own the customer-facing AppExchange marketplace platform (\$250M+ ACV, 500K MAU), leading 17 engineers across search, discovery, and transactions
- Launched **AgentExchange**, Salesforce's first AI marketplace – reduced 6-month roadmap to a 1-month MVP for TDX launch, aligning Product, Marketing, Legal, and Security; 73K pageviews, 940 partner leads, record traffic month
- Led **Next Gen Discovery** across search, browse, and listings: +107% impressions, +66% clicks, +27% listing views
- Unified fragmented regional codebases into a single LWC platform, unlocking component reuse throughout the Salesforce ecosystem
- Scaled team by hiring 10+ engineers and coaching ICs to Senior and Principal levels; established hiring bar and managed performance through clear expectations and formal plans

Engineering Manager, AppExchange Analytics, Search & Recommendations

November 2020 – February 2022

Salesforce – San Francisco, CA

- Formed 3-person strike team that prototyped new homepage in one month, securing executive funding for full rebuild
- Released new homepage loading **3x faster**; generated 15% more leads and 3x higher click-through rate
- Cut delivery from 3-week cycles to **daily deploys** via CI/CD; won senior leadership buy-in with data, blue/green deploys, and a built-in exit plan
- Promoted to Senior Engineering Manager in **13 months** for cross-org leadership

Engineering Manager, Agile Analytics

August 2019 – November 2020

Autodesk – San Francisco, CA

- Managed global DS/ML team (SF + Singapore) delivering analytics products for platform leadership
- Built vendor-spend and capacity-forecast dashboards adopted in executive reviews, improving budget accuracy

Engineering Leader & Enterprise Agile Coach

September 2016 – August 2019

Autodesk – San Francisco, CA

- Founded Cloud Standards Engineering Excellence Guild spanning 300+ services; reduced incidents per billion calls by **95%** and scaled practices via 15+ workshops across 10+ global sites (500+ engineers)

Full-Stack Software Engineer & Team Lead

August 2013 – September 2016

Autodesk – Novi, MI

- Led Fusion Lifecycle BOM views (Java Spring, Hibernate, JavaScript); coordinated delivery across 8 global teams

Software Engineer

July 2012 – July 2013

Tata Consultancy Services – Troy, MI

PROJECTS

Dangpacks – Full-stack marketplace (AWS CDK, PostgreSQL, Vue.js); **10,000 users**, 150K+ transactions

2021 – present

Arsicault Bakery – Online ordering + back-office system; React, Google Cloud, Square API

2023 – present

EDUCATION

Bachelor of Science, Computer Engineering, Michigan Technological University

2013
